PROFESSIONAL SUMMARY

Data Science student (GPA 4.0) — former educator and medical interpreter, now President of the Metro Analytics Club — with a Computer Science foundation and two consecutive 1st-place finishes in statewide data competitions (Minnesota AGENT.AI Challenge and HeatMap Healthcare Hackathon). Builds production-minded predictive models, interactive BI dashboards, and agentic-AI and computer-vision applications that turn raw data into measurable impact. Pairs strong technical skills in machine learning, analytics, and AI with proven leadership and communication developed across a nontraditional career path — building student communities, mentoring peers, organizing workshops and events, and presenting AI publicly to faculty and the Twin Cities tech community.

SELECTED RECOGNITION

- President's Outstanding Student Award Finalist (Nominated by Faculty and Advisors) — Metro State University (Dec 2026)
- 1st Place — Minnesota AGENT.AI Data Science Challenge (2025)
- 1st Place — HeatMap Healthcare Analytics Hackathon (2026)
- APIA / Wells Fargo Foundation AANAPISI Scholar • Kopp Family Foundation Scholar • Elizabeth Pegues Matching Scholar
- Dean's List (6 semesters) • Phi Theta Kappa Honor Society • NHCC Scholar

TECHNICAL & PROFESSIONAL SKILLS

- **Programming:** Python (Pandas, NumPy, Scikit-Learn), SQL, R, Java
- **Machine Learning & AI:** Predictive Modeling, Regression, Statistical Analysis, Agentic AI Workflows, Prompt Engineering, Computer Vision, Local LLM Deployment
- **Analytics & Data:** Data Cleaning & Wrangling, Feature Engineering, Exploratory Data Analysis (EDA), ETL
- **Visualization & BI:** Power BI, Tableau, Advanced Excel, SAP Predictive Analytics, JMP
- **Tools & Platforms:** Git, GitHub, Docker, AWS (EC2, S3), Streamlit, Jupyter Notebook, SPSS, Jira, Notion
- **Professional:** Bilingual (English/Mandarin), Stakeholder Communication, Public Speaking, Workshop Facilitation, Team Leadership, Mentorship

LEADERSHIP & COMMUNITY IMPACT

President — Metro Analytics Club (MAC), Metropolitan State University *Jul 2026 – Present*
Previously Vice President (Apr 2026 – Jun 2026)

- Lead Metropolitan State University's Metro Analytics Club, organizing analytics, AI, career-development, and industry-engagement initiatives for students.
- Developed and hosted competition-preparation workshops — including a session with 31 registered participants — guiding students through prior competition datasets, project strategy, and team formation.
- Coordinated speakers, workshops, networking events, and mentorship opportunities connecting students with industry professionals and faculty.
- Grew club engagement across LinkedIn, Discord, newsletters, and events; rebuilt club programming with speaker sessions, workshops, and competitions.
- Stood up operational frameworks — RACI ownership, session roadmaps, and event workflows — that improved coordination and execution consistency.

Community & Technology Engagement

- Demonstrated AI applications at AI Magic Night (July 2026) to faculty members and the Twin Cities AI community.
- Room host at MinneAnalytics and Applied AI 2025 conferences, supporting session logistics and assisting speakers and attendees.
- Volunteer at Minnesota Tech for Success (MTFS), refurbishing enterprise laptops and desktops — hardware diagnostics, repairs, and component testing.

Mandarin Medical Interpreter (Freelance), Healthcare & Education Settings *2023 – Present*

- Interpret in healthcare and education settings for Mandarin-speaking clients, conveying complex information accurately while maintaining confidentiality and cultural sensitivity.

City Carrier, United States Postal Service *2015 – 2022*

- Delivered to 400+ addresses daily at 99.9% accuracy under strict deadlines — a track record of reliability and independent problem-solving.

SELECTED PROJECTS

Data Science Capstone — Industry Partner *Fall 2026*

- Built a reproducible ETL and gap-analysis pipeline to turn millions of raw UPC transaction rows into a ranked sales-target list identifying unconnected retail opportunities.
- Implemented strict data-type discipline to prevent silent data loss and corruption of 12-digit UPCs and oversized organization IDs at data boundaries.

- Enriched seller attributes via external API lookups and built an ML-assisted prioritizer to optimize limited API budget on the highest-value targets.
- ***Environment:*** *Python, Pandas, R, ETL, External API, Power BI, Data Quality*

Retail Sales Patterns and Prediction — MIS 480 Group Project *Fall 2026*

- Engineered stockout-adjusted estimated-demand features to properly handle MNAR (Missing Not At Random) data censoring across 90-day retail series.
- Developed and tuned Multiple Linear Regression and Random Forest models using strict chronological train/validation/test splits to prevent future data leakage.
- Evaluated predictive performance using MAE, RMSE, and classification ROC-AUC, demonstrating robust improvement over naive previous-week baselines.
- ***Environment:*** *Python, Pandas, Scikit-Learn, Regression, Classification, Exploratory Data Analysis*

MinneMUDAC Graduate Analytics Challenge — The Food Group *Sep – Oct 2026*

- Competed in the Graduate Division as an undergraduate; built the team's end-to-end Python pipeline — 26 notebooks joining 4 operational datasets with 8 public sources (Feeding America Map the Meal Gap, Census ACS/TIGER, USDA Food Access Atlas, BLS CPI, state SNAP dashboard) across 87 Minnesota counties × 55 months.
- Cut county-level forecast error ~33% below the persistence baseline across 5 response variables by diagnosing ~9% month-to-month reporting noise and smoothing it instead of adding complexity; selected the model by walk-forward validation across 8 candidates.
- Measured a SNAP benefit-cliff shock with an interrupted time series (Newey–West HAC errors): +22% visits ($p<0.001$). Designed a falsifiable county unmet-need index with pre-registered rejection criteria, separating neighborhood poverty from grocery-desert access.
- ***Environment:*** *Python (Pandas, Statsmodels, Scikit-Learn, GeoPandas), Interrupted Time Series, Walk-Forward Validation, Fisher's Exact Test*

AI-Powered Sports Biomechanics Analysis Platform — TCDSA Innovation Studio *2026*

- Selected for the competitive 3-month industry cohort (Nonprofit AI Cohort); shipped an end-to-end AI application that scores athlete throwing mechanics from video using computer vision and a locally hosted LLM.
- Built the video-processing and pose-estimation pipeline (OpenCV, MediaPipe) and an interactive Streamlit interface returning AI-assisted coaching feedback — self-teaching computer vision, local LLM deployment, and AI workflow design.
- ***Environment:*** *Python, OpenCV, MediaPipe, Streamlit, Ollama, Computer Vision, LLM Integration*

HeatMap Healthcare Analytics Hackathon — 1st Place (19 Teams) *2026*

- Won 1st place with a perfect innovation score by integrating multiple public-health datasets to expose geographic gaps in burn-care access.
- Delivered decision-ready visualizations to guide healthcare resource allocation under a rapid-prototyping deadline, with full technical transparency.
- ***Environment:*** *Python, Data Visualization, GitHub, Public Healthcare Data*

Minnesota Data Science Challenge (AGENT.AI) — 1st Place State Winner *2025*

- Engineered a machine-learning and agentic-AI pipeline on retail-banking data that scored 0.8158 — the top result in the competition — to win 1st place statewide.
- Owned feature engineering, pipeline validation, and model evaluation end to end, enforcing reproducible workflows across the team.
- ***Environment:*** *Python, SQL, Scikit-Learn, Agentic AI, JSON Structured Output*

MENTORSHIP & PROFESSIONAL DEVELOPMENT

- **Social Data Science Mentorship Lab:** Community-based mentoring accelerator for data professionals (Fall 2026 – Present).
- **Data Angels Mentorship Program (Cohort 5):** Selected for a six-month career-mentoring match with industry mentor Sravanthi Kondoju (Jun – Dec 2026).
- **Cargill Mentorship Lab (Inaugural Cohort):** Selected for Cargill's first mentorship cohort, hosted at Cargill headquarters in Wayzata, MN (2026).
- **TRIO Student Support Services Scholar:** Active since 2022, supporting academic achievement, leadership development, and transfer success.

CERTIFICATIONS

IBM Data Analyst Professional Certificate • Google Advanced Data Analytics Professional Certificate • Meta Database Engineer Professional Certificate • Generative AI Fundamentals (Udacity) • Public Speaking Professional Certificate

EDUCATION

B.S. Data Science, Minor: Applied Statistics — Metropolitan State University *Expected Dec 2026*

GPA 4.0 • President, Metro Analytics Club • Dean's List • Kopp Family Foundation & APIA/Wells Fargo AANAPISI Scholar

A.S. Computer Science (Transfer Pathway) — North Hennepin Community College

GPA 3.93 • Phi Theta Kappa Honor Society • NHCC Scholar

B.S. Political Science — Hangzhou Normal University
